Simon Fraser University

BSc. Interactive Arts & Technology

Jan 2021 – May 2025

Co-operative Education

Concentration:

Design & Interactive Systems

LANGUAGES

- Korean
- English

SUMMARY

UX/UI Designer with a BSc in Interactive Arts & Technology and one year of full-time co-op experience at SFU Graduate Studies. Experienced in designing websites, interfaces, digital communications, and visual assets, with hands-on experience in Figma, Adobe Creative Suite, AEM, and front-end development. Interested in creating clear, practical experiences through research, prototyping, visual design, and testing.

WORK EXPERIENCE

Simon Fraser University, Graduate Studies — Aug 2023 – Aug 2024

Communications & Marketing Associate · Co-op

- Manually updated and restructured 50+ individual Graduate Studies web pages in Adobe Experience Manager to reflect the department's new name, including navigation, content hierarchy, and page layouts, following existing SFU visual guidelines.
- Converted administrative forms into interactive InDesign PDFs, reducing the need for students and staff to print and scan documents.
- Designed web banners, event posters, email graphics, and other visual materials for Graduate Studies communications.
- Redesigned the Canvas orientation layout for 1,000+ incoming graduate students each year to better organize onboarding content.
- Created a reference guide documenting daily, weekly, and monthly responsibilities to support the transition to the next co-op student.

PROJECTS

Even$ync

Aug 2026 – Present

Product Definition & UX/UI Designer · Personal Project

- Collaborated with a project partner to define Even$ync's core problem and features, then independently led the UX/UI design, user flows, and screen structure across ~70 screens, from onboarding through closing a shared expense tab.
- Designed item-level splitting for Equal, Percent, and Exact amounts, including validation and rounding states for each method.
- Mapped payment, guest, and shared-link flows, including empty, error, and edge cases beyond the main user flow.
- Prepared a Figma design system and annotated developer handoff, documenting flows, component states, and implementation notes for two developers.

MomoTodo

May – Jun 2026

User Flow Design & Development · Personal Project

- Designed the user flows for a Windows desktop to-do app, built in Electron and React through AI-assisted development.
- Tested multiple versions with 10+ users, identifying issues, refining the app, and repeating the build-and-release cycle across 7 updates.
- Designed backup and error-handling features to help prevent data loss during app updates.

Jadeco

Sep – Dec 2024

UX Research & Visual Design · Academic Project

- Conducted in-person research at home decor retailers across Metro Vancouver to understand the local market and existing brand positioning.
- Created hand-drawn storyboards for the brand film and produced the illustration assets.
- Edited the brand film from the rough cut through the final video.
