SKILLS

DESIGN TOOLS

- Figma
- Illustrator
- Photoshop
- InDesign
- Premiere Pro
- AEM

DEVELOPMENT

- HTML / CSS
- JavaScript
- Bootstrap
- Git

UX / UI METHODS

- User Research
- Wireframing
- Prototyping
- Usability Testing
- Journey Mapping

VISUAL DESIGN

- Illustration
- Storyboarding
- Layout Design
- Video Editing

EDUCATION

Simon Fraser University BSc. Interactive Arts & Technology

Jan 2021 – May 2025
Co-operative Education
Concentration:
Design & Interactive Systems

LANGUAGES

- Korean
- English

SUMMARY

UX/UI and Graphic Designer with a **BSc in Interactive Arts & Technology** and one year of full-time co-op experience in a large institutional setting. Believes good design reduces friction — for the person filling out a form or navigating a website for the first time. Skilled across the full design process: **user research, wireframing, prototyping, visual design**, and front-end implementation, with additional experience in illustration, storyboarding, and video production.

WORK EXPERIENCE

Simon Fraser University — Graduate Studies

Aug 2023 – Aug 2024

Communications & Marketing Associate · Co-op

- Restructured 50+ web pages in Adobe Experience Manager during a department-wide rebrand, improving navigation, readability, and content hierarchy across the Graduate Studies site.
- Converted key administrative forms into accessible, fillable PDFs in InDesign, eliminating the print-scan cycle and reducing processing time for students and staff.
- Designed digital and print assets including web banners, event posters, and email graphics used in campus-wide communications reaching students and faculty.
- Redesigned the Canvas orientation interface, improving the onboarding flow for 1,000+ incoming graduate students each year.
- Refactored and documented an internal HTML-based student profile generator, reducing page creation time significantly; the tool remained in active use after the co-op term.

PROJECTS

FLUI Hackathon — Banana Art Lab

Feb 2025

UI/UX Designer · 3-Day Hackathon

- Mapped the existing site's core UX issues, then led the booking flow redesign across 5 distinct services, creating a consistent step-by-step structure by the final presentation.
- Developed custom illustrations and contributed to the new brand identity (logo, color palette, typography); delivered a fully interactive Figma prototype.

Jadeco

Sep – Dec 2024

UX Research & Visual Design · Academic

- Conducted in-person field research at home decor retailers across Metro Vancouver to identify positioning gaps for a Chinese brand entering the local market.
- Created hand-drawn storyboards to establish the visual direction of the brand film, designed illustration assets used throughout the video, and handled editing from rough cut to final delivery.

VOLUNTEER

Library Web App — Smart Book Borrowing System

May 2026 · In Progress

Volunteer UX/UI Design Contributor · Government & Corporate-Sponsored Project

- Stepped in as the sole designer on a 4-person dev team (robotics, AI, back-end) building a government-sponsored smart library system, redesigning the information architecture and building a full Figma component library from scratch.
- Designed all key screens covering the full borrowing flow and provided UX feedback after the team's first implementation pass, bridging the gap between technically functional and actually usable.
