- BSc. Interactive Arts & Technology
- Jan 2021 – May 2025
- Co-operative Education
- Concentration:
Design & Interactive Systems

LANGUAGES

- Korean
- English

SUMMARY

UX/UI and Graphic Designer with a **BSc in Interactive Arts & Technology** and one year of full-time co-op experience in a large institutional setting. Focused on making digital experiences simpler and more intuitive, whether streamlining complex workflows or designing user-friendly interfaces. Skilled across the full design process: **user research, wireframing, prototyping, visual design**, and front-end implementation. Also works in illustration, storyboarding, and video.

WORK EXPERIENCE

Simon Fraser University, Graduate Studies

Aug 2023 – Aug 2024

Communications & Marketing Associate • Co-op

- Restructured 50+ web pages in Adobe Experience Manager during a department-wide rebrand, improving navigation, readability, and content hierarchy across the Graduate Studies site.
- Digitized key administrative forms using InDesign, eliminating manual print-and-scan workflows and streamlining processing times for students and staff.
- Designed digital and print assets (web banners, event posters, email graphics) for campus-wide communications reaching students and faculty.
- Redesigned the Canvas orientation interface, improving the onboarding flow for 1,000+ incoming graduate students each year.
- Overhauled the outdated role manual, documenting daily, weekly, and monthly responsibilities into a clear reference guide praised by the supervisor and used effectively by the incoming successor.

PROJECTS

MomoTodo

May – Jun 2026

UX Design & AI-Assisted Development • Personal Project

- Designed and built a Windows desktop todo app (Electron + React) from initial sketches to a packaged release, with 4 task types, urgency visualization, and 8 switchable themes.
- Tested with 10+ real users across 4 versions, resolving bugs and UX issues that only showed up in actual use.
- Addressed user pain points through key UX enhancements, including task archiving over deletion, real-time theme previews, and persistent per-page sticker states.

FLUI Hackathon, Banana Art Lab

Feb 2025

UI/UX Designer • 3-Day Hackathon

- Audited existing site UX and led the redesign of a streamlined, multi-step booking flow across 5 services.
- Developed custom illustrations and contributed to the brand identity (logo, color palette, typography); delivered a Figma prototype by the final presentation.

Jadeco

Sep – Dec 2024

UX Research & Visual Design • Academic

- Conducted in-person field research at home decor retailers across Metro Vancouver to map positioning gaps for a Chinese brand entering the local market.
- Created hand-drawn storyboards to shape the visual direction of the brand film, produced the illustration assets, and edited the video from rough cut to final version.
